NBA I/41; BC B24

J.S. Bach - Church Cantatas BWV 150 Symmetrical Form: Sinfonia-Chorus-Aria (S)-CHORUS-Trio (ATB)-Chorus-Chorus. Style is like Buxtehude. Very sectional, like points of imitation in a motet. 3-part string writing (no viola), no chorales (though 4 of the 7 movements are for chorus), no recitatives. Vivid word painting: e.g., 3.5 octave ascending scale for 150/4 ("Leite mich...." After short sinfonia with chromatic descending lines, chorus follows with descending lines for "Nach dir, Herr, verlanget mich." Other instances of word-painting include constant 16th pates in continuo & bassoon against chardly vocal trio. Occasion Unknown (BWV 131, 150, 117, 192, 100, 97). Perhaps this cantata was intended for a day of penitence. Martin Petzoldt suggests the 3rd. S. after Easter, finding allusions to that day's Epistle (1 Pet. 2:11–20) and Gospel (Jn. 16:16–23a) in movement 7. See "Bach Kommentar," vol. 1, p. 815. Librettist: Unknown

painting include constant 16th notes in continuo & bassoon against chordal vocal trio in movement 5 to depict storm ("Zedern müssen von den Winden..."), static J.S. Bach harmonies in first section of movement 6 ("Meine Augen sehen stets zu dem Herrn"); ends with a "ciacona" in movement 7, Bass line ascends a Time of Composition: Unknown; during or before Bach's Mühlhausen period. See note about Hans-Joachim Schulze's discovery of acrostic in ibretto identifying Mühlhausen town council member and sometime mayor. Some scholars think the work may not be by J. S. Bach (no violas and no chorales). The work survives as a Christian Friedrich Penzel manuscript from 1755.

Nach dir Herr verlanget mich

According to Grove Dictionary's list of works for Bach, cantatas with independent bassoon (apart from continuo) include 131 (1707), 150 (1707–1708), 153 (1716), 190 (1724), 52 (1726), 149 (1728? 1729?), 177 (1732).

1. Sinfonia in Eric Chafe's view, the tonal scheme of the cantata (moving up from B minor in a "sharpward" direction and then down again) represents a symbolic shift between earthly existence (with its struggles) to faith in and hope for Christ's help. See more below. In general, Chafe views Bach's vocal works through the lens of tonal anabasis and catabasis.

Instrumentation (Modest, trio sonata instrumental writing): VIn I, II Bassoon (independent) **SATB** Continuo

Descending chromatic tetrachord, traditional symbol of lament (used, for example, in the "Crucifixus," of Bach's B-Minor Mass), and the string duet with syncopated figure both reappear in following choral movement. Here the chromatic line may signify "Verlangen" (see below). The descending chromatic 4th (preceded by an 8va leap up) in this first movement is counterbalanced by the ascending diatonic 5th (followed by an 8va leap down) in the last movement.

150/2. **2. Coro** • Prayer of hope and trust in God: Ps. 25:1–2 (150/2).

This chorus is episodic or sectional in the manner of a motet, each section having a tempo and musical material appropriate to the text.

Soprano

Chromatic Saturation in the vocal parts in 10 mm. Wolff notes that the advanced temperament of Bach's Alto organ allowed such chromaticism. See "Bach the Learned Musician," 101.

Text painting: Theme: 8va leap upward followed by chromatic descent links this movement to the sinfonia and (together with an **Tenore** of vocal entries) depicts a prayer of longing raised to God.

Basso

Descending chromatic tetrachord (also a shorter chromatic line) and string duet with dotted syncopated figure from the Sinfonia reappear, the chromatic line in the vocal parts and the string duet with syncopated figure in the instrumental episodes (joining the vocal parts in mm. 15-20).

S leads,

accompany

with chordal interjections

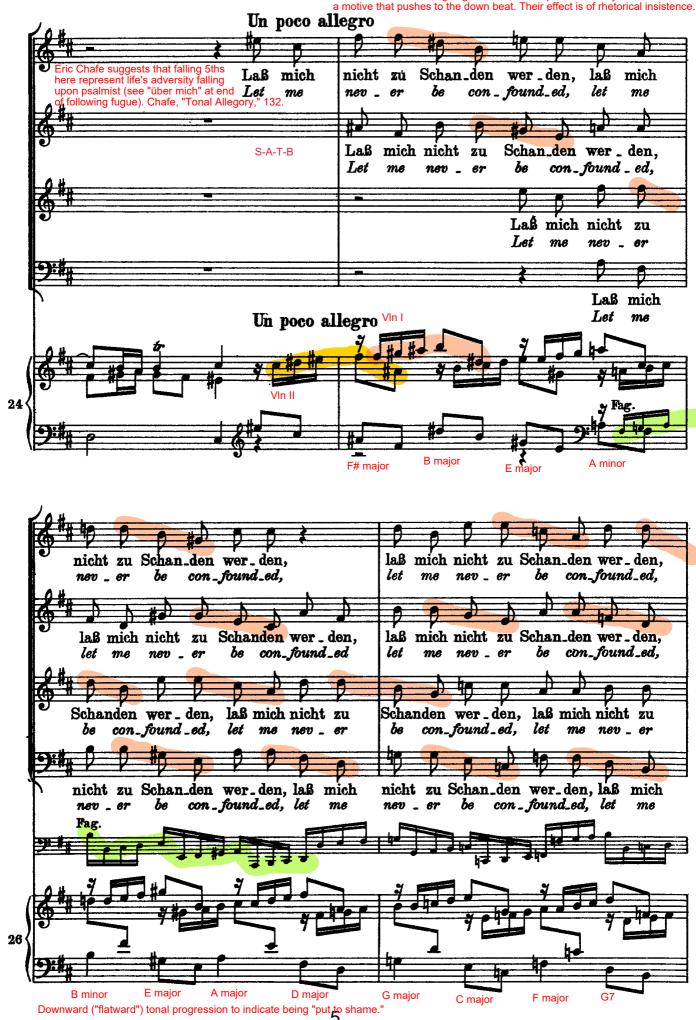

In the psalm, these two words belong to the next sentence. Here they form a bridge between the two sections with a kind of Phrygian cadence leading to F# minor.

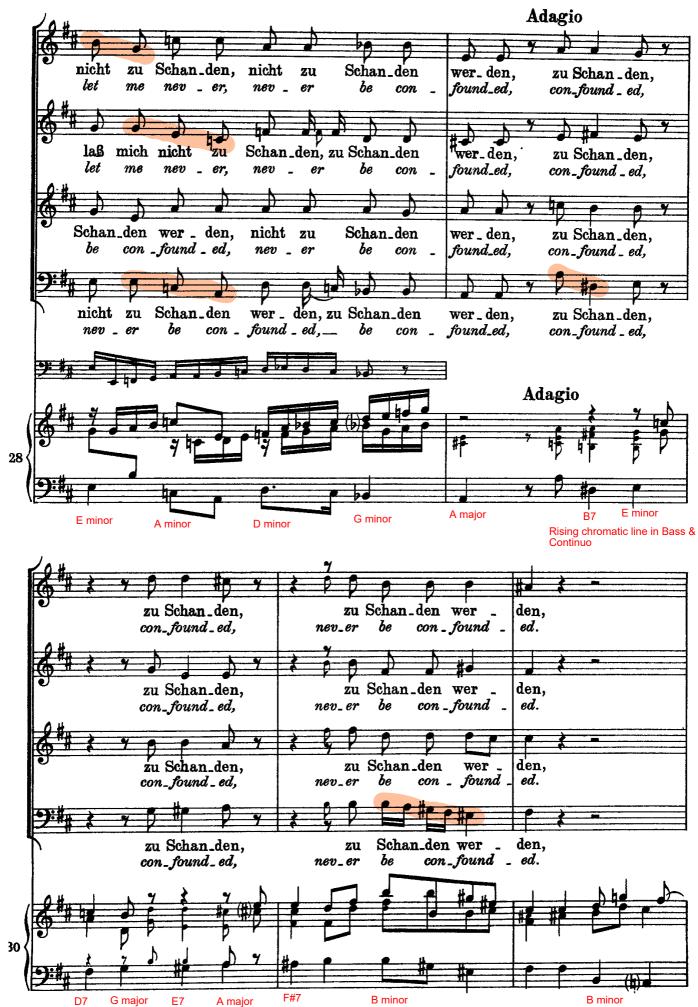

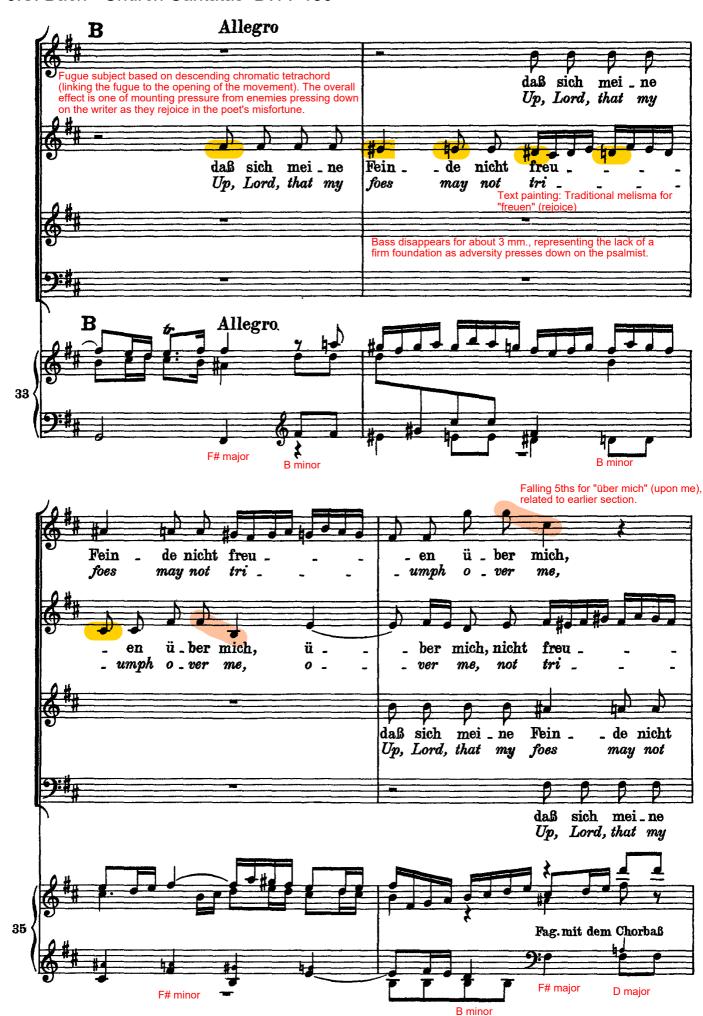

4-measure allegro section serves as a motto introduction to a fugue-like section. Such a sectionalized approach is typical of typical motet structure, used by Bach in his earliest cantatas (e.g., BWV 130).

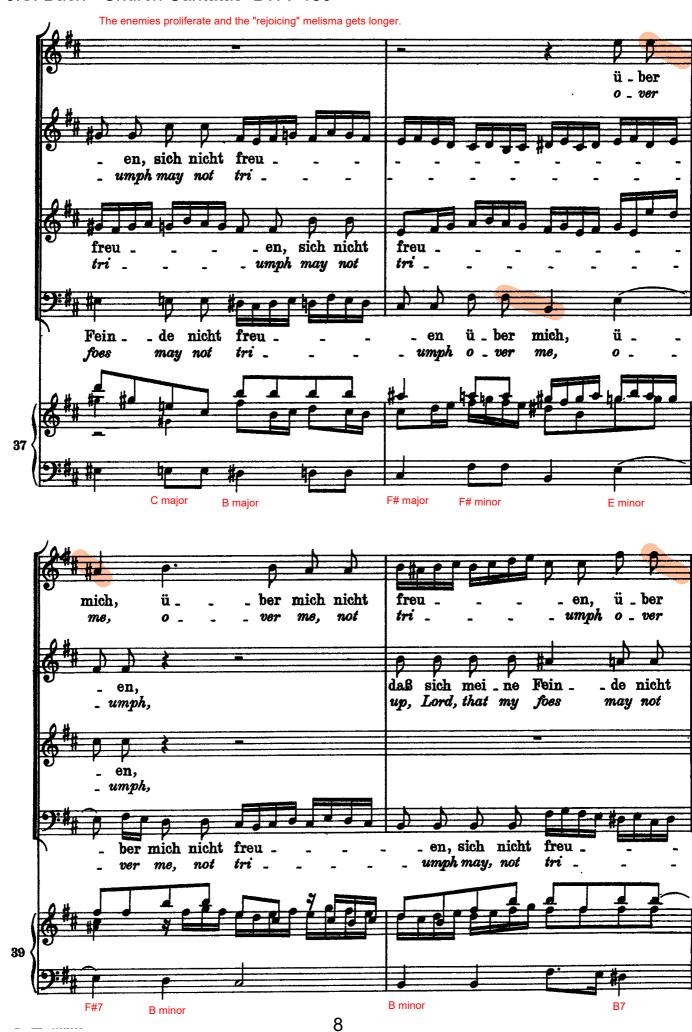

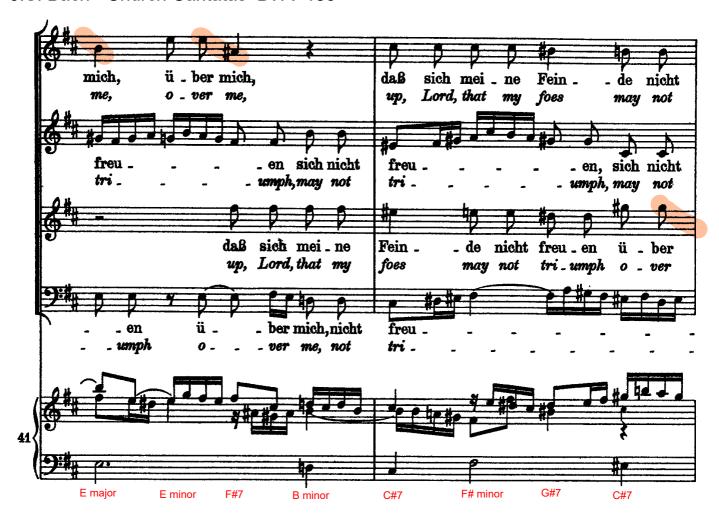

Eric Chafe suggests that departures from the work's main tonality of B minor upward (such as C# major here and, especially, D major in 150/4) -signify a change in focus from the world of tribulation to the hope of redemption. See "Tonal Allegory," 132–33.

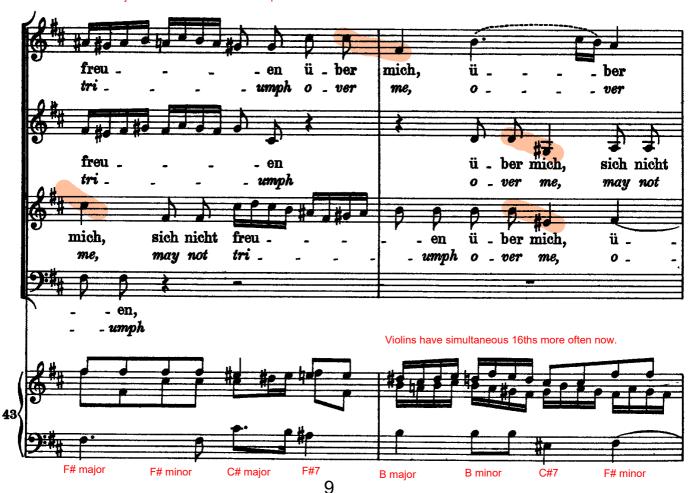

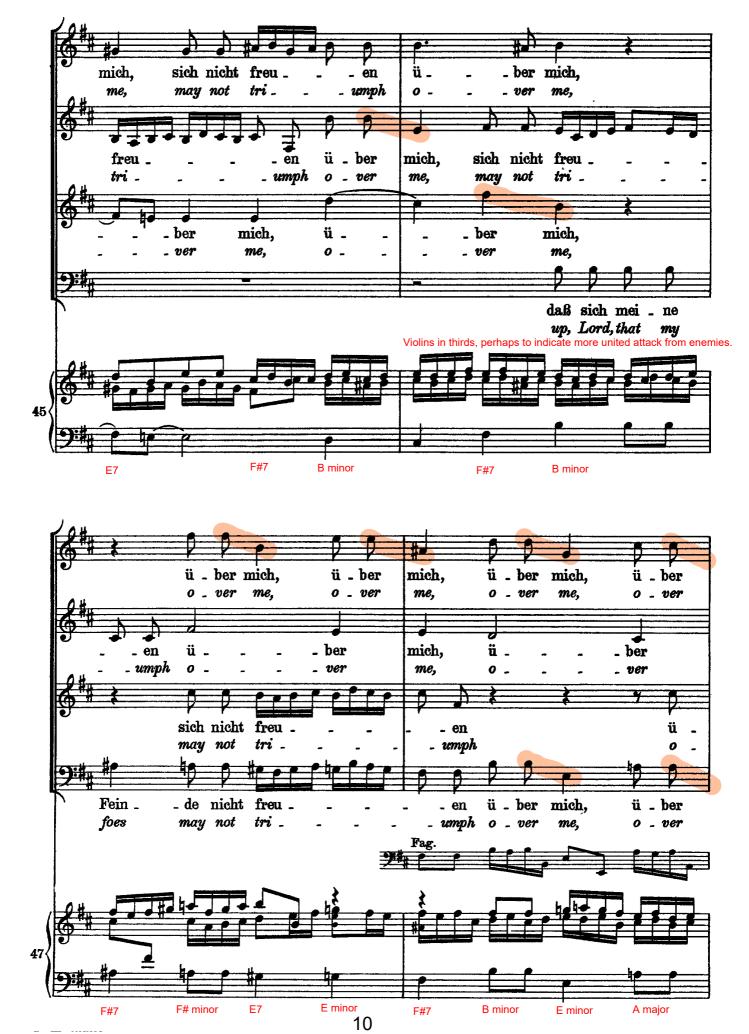

Enemies rejoice in duet-fashion for added pressure.

D major

B minor

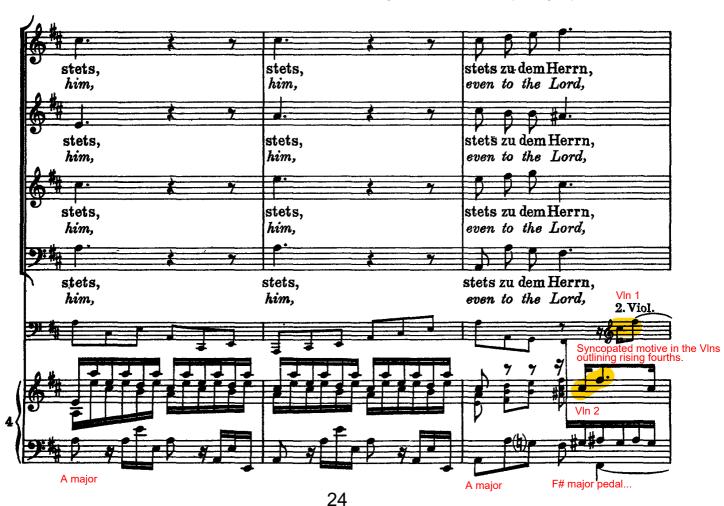

150/6. **6. Coro** • Faith God will rescue my foot out of net: Ps. 25:15 (150/6).

Form: A kind of prelude and fugue.
The first part of this movement may be considered an example of "Vokaleinbau": the embedding of vocal writing in instrumental textures.

Thematic material similar to foregoing movement: perpetual 16th note motion in instruments with slower, somewhat static chords in voices.

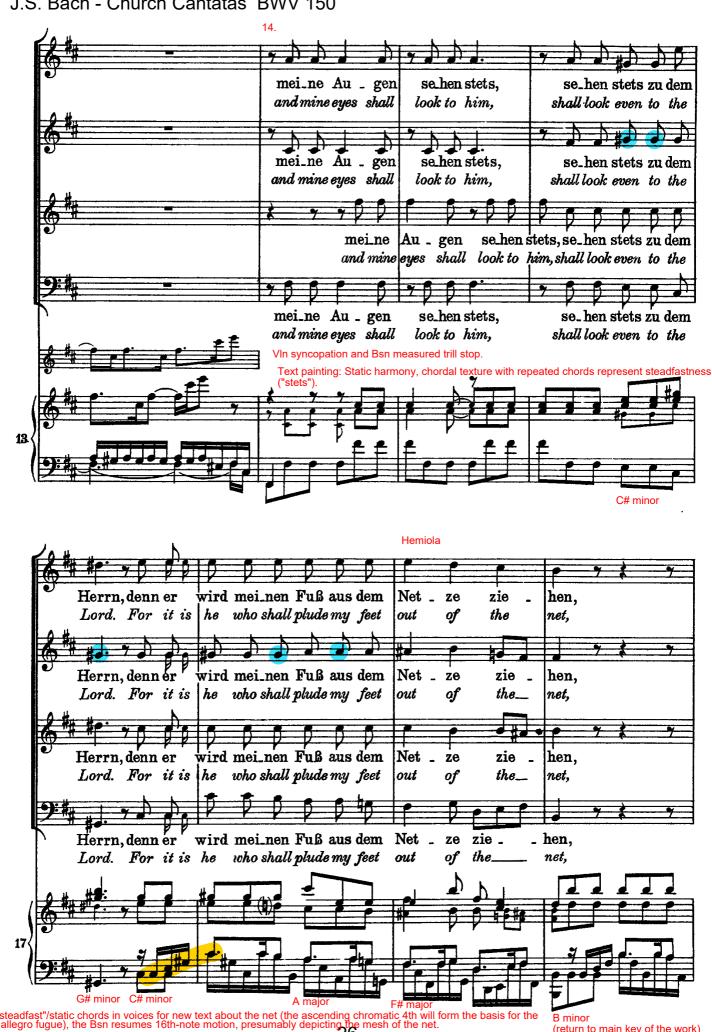

Static harmonies in the first section reflect the the steadfast gaze described in the text ("holding on").

The overall effect of the rhythm is a sense of wobbling or oscillation, presumably to depict a wavering determination to keep one's eyes steadfastly on God ("stets zum dem Herrn").

Despite "steadfast"/static chords in voices for new text about the net (the ascending chromatic 4th will form the basis for the following allegro fugue), the Bsn resumes 16th-note motion, presumably depicting the mesh of the net.

(return to main key of the work)

J.S. Bach - Church Cantatas BWV 150

Fugue subject here has ascending diatonic fourth (rising fifth in answer)—the opposite of the descending chromatic tetrachord heard earlier. In this regard, compare the chromatic descending fourth in the bass ostinato of the "Crucifixus" of the B-Minor Mass with the diatonic rising fourth in the equidistant "Gratias" and Dona nobis. See Melvin Unger, "Chiastic Reflection in the B-Minor Mass: Lament's Paradoxical Mirror," in "Exploring Bach's B-minor Mass," ed. Yo Tomita, Robin A. Leaver, and lan Smarzny, London: Cambridge University Press, 2013.

 $\boldsymbol{\sigma}$

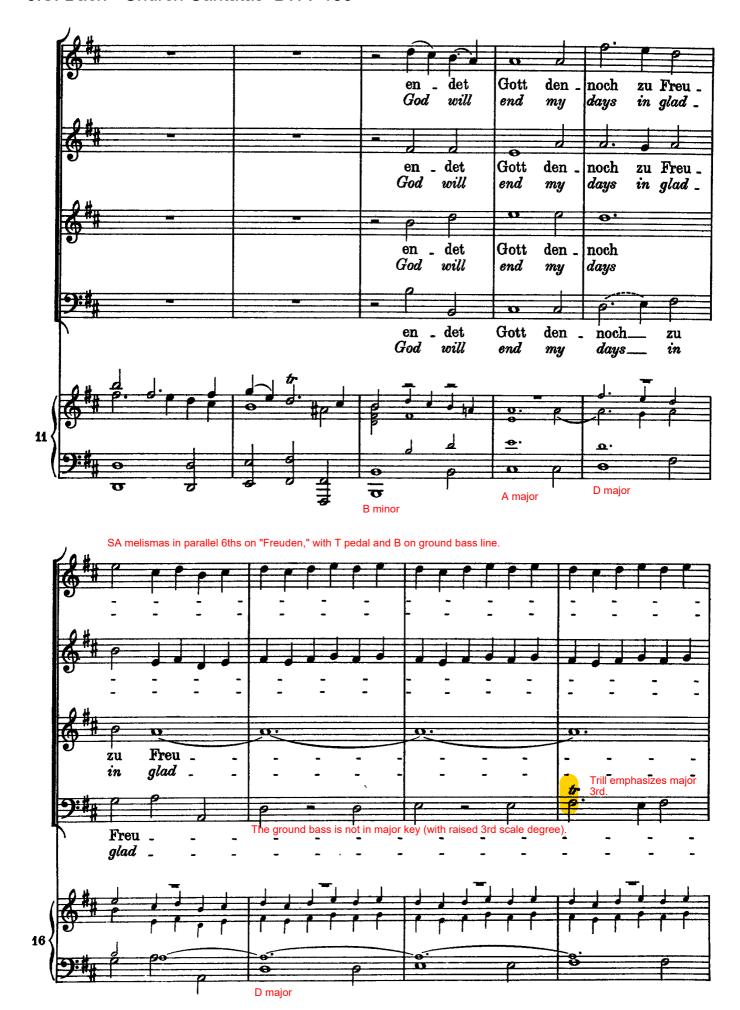

Bach moves through a number of different keys.

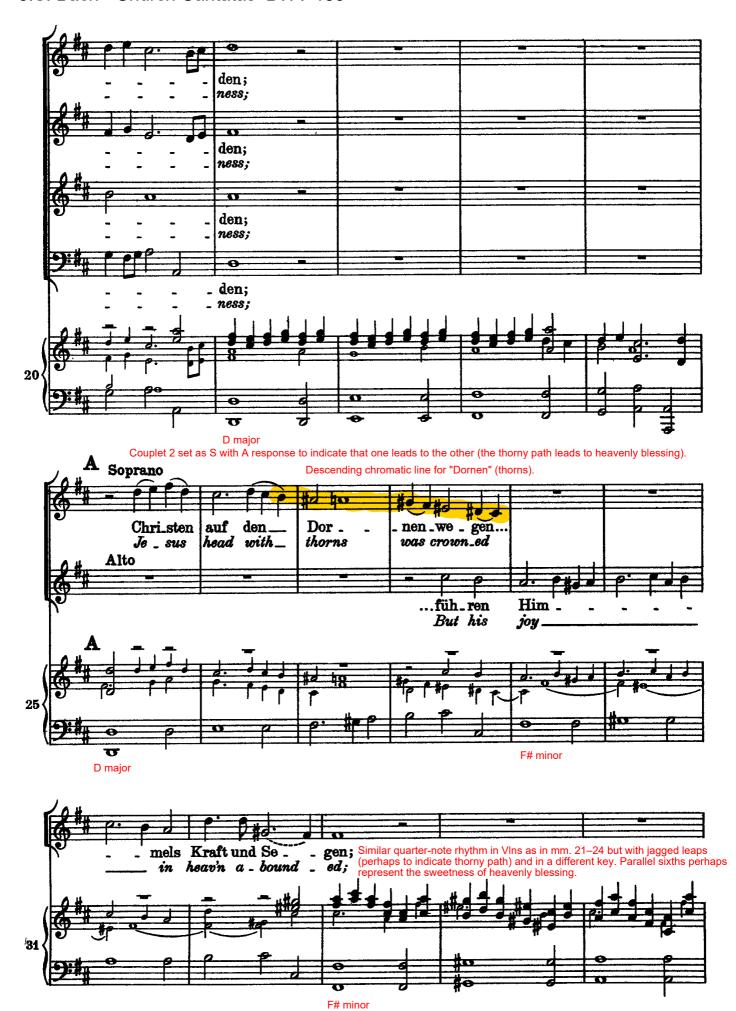

Eric Chafe sees the rising fifth of the ostinato bass as a symbol of hope (reversing the earlier descending chromatic fourth and "net" idea), while the key of B minor represents earthly life. Thus, the movement espouses hope in this life. The poem consists of 3 couplets with antithetical ideas, followed by two couplets voicing "God's aid to mankind in overcoming the world through Christ's presence." The tonal scheme reflects this rising (anabasis) concept: B minor-D major-F# minor-A major-E major (keys are moving in a sharpward direction). This tonal progression is accompanied by increased instrumental rhythmic activity. See Chafe, "Tonal Allegory," 133–34.
